

RESIDENTIAL

# Custom-Crafted and Streamline Elevator Interiors for Modern Residential Living

## 5 Reasons Residential Managers Choose Eklund's

**Wide selection of material palettes:** Access to standard and premium wood veneers, stones, and custom metals that mirror your building's high-end interior design.

**High-traffic durability:** Our cab interiors are engineered in-house to withstand the relentless volume of modern residential hubs while maintaining a "day-one" appearance.

**Enhanced property value:** A modern, bespoke cab renovation is one of the most visible ways to upgrade a property and attract premium tenants.

**Minimal tenant disruption:** Our project management and installation teams prioritize efficiency and reliability for minimal disruption and downtime.

**On-time delivery:** Dual manufacturing facilities in Dallas and Baltimore ensure rapid production and installation for residential projects.

For many residential developments, the elevator is an extension of the home. Eklund's creates bespoke interiors that blend comfort with sophisticated design to help increase property value and tenant satisfaction.

We manage the entire process from design to installation, and fabrication is done in-house at our Dallas/Fort Worth and Baltimore/Washington DC facilities. We are ISO 9001:2015, ISO 45001:2018, & ISO 14001:2015 certified for the highest possible of standards.
